» A LOOK INSIDE THE RECENTLY COMPLETED RIVERVIEW SCHOOL STUDENT CENTER

November 29, 2010 (Beverly, MA) - The Riverview School, located in East Sandwich, Massachusetts, recently celebrated a dedication ceremony of the newly constructed James Center, a 20,000 square foot building that features a theatre, café, gallery, school store, media center, library, Admissions and Operations offices and several new classrooms for the arts. Planning for the school's new student center began nearly a decade ago, but really gained momentum three years ago when Siemasko + Verbridge came on board to provide architectural, interior and landscape design services. With ACELLA Construction, based in Norwell, MA, as the general contractor, construction broke ground in June 2009. The project was near completion by late August 2010, in time for students and faculty to move in by opening day of the school year.

One of the prime objective's of the school is to prepare disabled students for productive lives beyond school. The new James Center gives students the opportunity to learn retail in the school store, learn how to operate lighting and sound equipment in the theatre and learn how to make and serve food and beverages in the café. The majority of the students live at the school to learn as much outside of the classroom as they do inside – such as problem solving and self reliance.

The new James Center's design has many curved lines, large windows that let in an abundance of natural light and modern fixtures that give a crisp, polished look. The new theatre, which seats 350, keeps the ocean and Cape feeling; it's bright and even opens up to an outdoor amphitheater. The gallery just outside the theatre displays work created by other artists with disabilities around the nation, and there is a separate gallery area showcasing student's artistic work.

The School has applied for the Leadership in Energy and Environmental Design certification for the building. Solar panels and recycled materials are just a few of the green elements of this design. Inspired by the over-riding goal that each student be able to reach their full potential in a safe environment, Siemasko + Verbridge's design invites a sense of community into the life of the school and creates a welcoming presence for both students and prospective families.

Siemasko + Verbridge of Beverly, MA provided architectural, interior and landscape design services for the project. ABC Subcontractors who worked on Riverview School project included Ahern Painting, Architectural Caulking & Waterproofing, Barnes Building, Cintas Fire Protection, Fernandes Masonry, LC Anderson and National Lumber.

NEW WORK & RECENT AWARDS

» ACELLA CONSTRUCTION BREAKS GROUND ON NEW COMMUNITY NURSERY SCHOOL IN LEXINGTON

October 12, 2010 - Acella Construction announced today that it has begun construction of the new Community Nursery School (CNS) in Lexington MA. The new building, which will be located on the same site at 2325 Massachusetts Ave., will include an updated floor plan with classrooms off a central hallway. The plan also calls for additional meeting space, a library, an art studio, and music space. The new school is scheduled to open its doors next fall. While construction is ongoing on Massachusetts Avenue, the school and students have been relocated to temporary space in Trinity Covenant Church on Clematis Road.

“We’re excited to break ground on this project,” said David Dirubbo, President of Acella Construction. *“When completed, this new school will give the CNS family a great new home to continue their important mission of fostering social, emotional, physical, and intellectual growth.”*

CNS began with a small group of families in 1943, with a goal to provide a quality nursery school experience for children in the years between infancy and public school. In 1947, CNS moved into a building on its own 2 acres of land in Lexington and was incorporated as a nonprofit cooperative institution.

The project is being designed by LDa Architecture & Interiors of Cambridge MA. To find out more about Community Nursery School, please visit their website, www.cnslex.org

» ACELLA CONSTRUCTION BREAKS GROUND ON NEW CARDINAL SPELLMAN FITNESS CENTER

November 9, 2010 - Cardinal Spellman High School, which serves students from 40 different communities, broke ground today for their new Fitness Center, which will be the first new building at the regional Catholic High School in more than 50 years.

The 5,000-square-foot center is set to open in 2011. *“We’re honored to be working with Dr. John McEwan and his team on this project,”* said David Dirubbo, President of Acella Construction. *“My wife graduated from Cardinal Spellman, so this project is very near and dear to both of us.”* The \$1.4 million fitness center will also include a new weight room, offices for the athletic department, a trainer’s room and a home for the school’s athletic Hall of Fame. The facility will be open for use by students, staff and faculty. The architect for the project is Ai3 of Wayland MA.

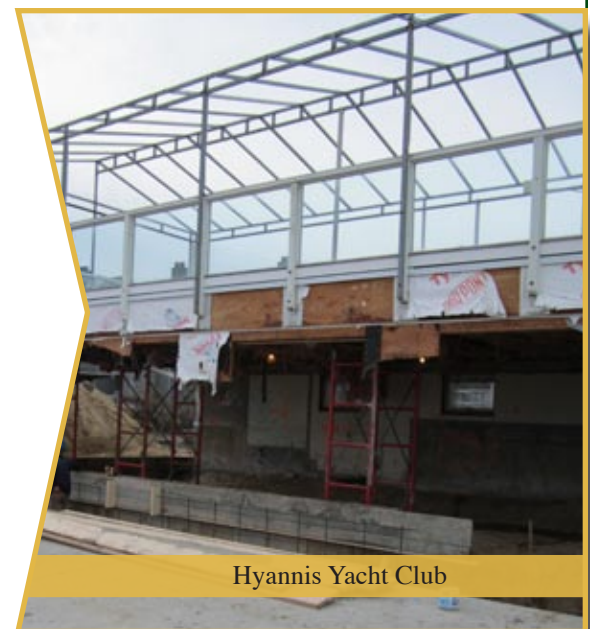

» ACELLA CONSTRUCTION SELECTED FOR NEW ENGLAND VILLAGE PROJECT

October 25, 2010 - Acella Construction announced today that it has been selected by New England Village, located in Pembroke, MA, to handle the renovation of their group homes. The scope of the work will include several small additions, as well as new interior layouts and finishes, new MEP systems, new exterior finishes including roofing, siding and windows, as well as new patios to complete the landscaping.

“We’re thrilled to begin working for New England Village. This project will enrich the lives of all the residents of the campus” said David Dirubbo, President of Acella Construction.

New England Village is a campus-based residential community where adults with intellectual and related developmental disabilities can lead dignified and enriching lives filled with opportunities for growth and friendship. The project is being designed by Group 7 Design, based in Franklin, MA. To find out more about New England Village, please visit their website at www.newenglandvillage.org

INSTITUTIONAL

- » Non-Profit/Special Needs
- » Healthcare

We believe there's a need for the services of a company that is enthusiastic, focused, and committed to ensuring that the clients' objectives, goals and needs are consistently met. In addition to providing a quality built product within the agreed upon schedule, we bring to the table professionalism, expertise, experience, communication skills and a pro-active "can do" approach.

We align ourselves with our clients in a truly partnered environment to provide quality solutions for our clients' construction needs. Not only will the "bricks and mortar" be a quality product, but the entire process will be enhanced through Acella's participation. Our clients receive the attention and cost effectiveness of a small firm with the knowledge and experience of a larger firm.
